PROFESSIONAL SUMMARY

Senior .NET & AI engineer and technical lead with 11+ years of experience shipping production software on ASP.NET Core, Angular/React, Azure and AWS, including AI agents, RAG search and MCP servers. Co-founded LogiqCube Consulting (25+ clients across the US, UK, UAE and India) and built and runs 4 multi-tenant SaaS products end to end, from architecture and data security to deployment and on-call. Led a team of up to 6 developers delivering enterprise SaaS for a Dubai-based client. Open to senior .NET/AI roles, full-time or contract.

TECHNICAL SKILLS

- **AI & LLM:** AI Agents (Microsoft Agent Framework, tool calling), Model Context Protocol (MCP), Microsoft.Extensions.AI, Azure AI Foundry, Azure OpenAI, RAG, Hybrid Search, Embeddings, pgvector, LLM Evaluation & Observability, Python (LLM tooling, agents)
- **Backend:** C# 14, .NET 10 (LTS), .NET 8, ASP.NET Core Web API (REST), Entity Framework Core, Dapper, LINQ, SignalR
- **Architecture:** Clean Architecture, CQRS/MediatR, Multi-Tenant SaaS, Role-Based & Policy-Based Authorization (JWT, OAuth)
- **Frontend:** Angular 20+ (Signals, Standalone Components), React 19, Next.js, TypeScript, RxJS, HTML5, CSS3, Bootstrap
- **Database & Storage:** SQL Server, PostgreSQL, T-SQL, Query Optimization & Indexing, S3-compatible object storage (MinIO)
- **Cloud & DevOps:** Azure (App Service, Blob Storage), AWS, Docker, Linux VPS, CI/CD, Git, Sentry
- **Testing & Practices:** xUnit, NUnit, MSTest, Moq, Integration Testing, Swagger/OpenAPI, Postman, Agile/Scrum, Code Reviews

PROFESSIONAL EXPERIENCE

Technology Partner & Principal Engineer – LogiqCube Consulting (Remote) **Jun 2020 – Present**

- Co-founded LogiqCube with an operations partner and grew it to 25+ clients across the US, UK, UAE and India; own architecture, data security and delivery, and build the critical components personally.
- Built and shipped 4 SaaS products end to end (LogiqWealth, LogiqAssist, LogiqLead, LogiqMoM), covering AI document extraction, RAG search, AI chat assistants and CRM integrations (Salesforce, Redtail).
- Build AI agents with tool calling and MCP servers in .NET using Microsoft Agent Framework, Microsoft.Extensions.AI and Azure AI Foundry, with evaluation and tracing, behind a provider-agnostic AI layer so models (Azure OpenAI, Gemini, Groq) swap without touching business logic.
- Build with ASP.NET Core (.NET 6–10), CQRS/MediatR, Angular/React/Next.js and SignalR; run multi-tenant SaaS on Docker and Linux VPS with CI/CD, automated unit and integration tests and Sentry error tracking; own uptime monitoring, alerting and database crash recovery.

.NET Development Team Lead – Luminosoft Technology Solutions (Contract, Dubai, Remote) **May 2023 – Jan 2026**

- Alongside LogiqCube, led a team of up to 6 developers to architect and deliver enterprise SaaS web applications for a Dubai-based client using ASP.NET Core Web API, React/Angular and SQL Server, supporting thousands of concurrent users; worked directly with product owners on technical specifications.
- Owned AWS deployments end to end, reducing manual deployment and operations effort by about 30%.
- Improved database performance with EF Core and Dapper through indexing, query optimization and access-pattern fixes.

Earlier Experience **Jan 2015 – Jun 2020**

- **Software Engineer – Spaculus Software** (Mar 2019 – Jun 2020): Led development of a financial planning application serving 10,000+ active users with React and ASP.NET Core Web APIs; improved performance by 25% through SQL query optimization and indexing.
- **.NET Developer – Rigel Networks** (Nov 2018 – Feb 2019): Built Angular real-time dashboards for Propixy, a property management platform, cutting reporting turnaround by 40%.
- **.NET MVC Web Developer – Bharti Soft Tech, ITACT Solutions, Brelicon Technologies** (Jan 2015 – Sep 2018): Built REST APIs and features for Quickscrum (project management SaaS on Azure), ReadyEMR hospital management modules (patient records, billing, scheduling, role-based access) and a placement management system, using ASP.NET MVC, Web API and SQL Server.

KEY PROJECTS

- **LogiqWealth** – wealth.logiqcube.com (ASP.NET Core, React, LLM extraction): AI platform for US wealth advisory (RIA) firms that extracts client data from statements, insurance and tax documents into a searchable Client 360 profile with automated client reports; 10 modules shipped, with live Salesforce and Redtail integrations.
- **LogiqAssist** – assist.logiqcube.com (.NET 8, Clean Architecture, Next.js, pgvector, Gemini embeddings): Multi-tenant document Q&A platform using RAG with hybrid search, S3-compatible document storage and an AI chat assistant.
- **LogiqLead** – logiqlead.com (ASP.NET Core, Clean Architecture, Docker, PostgreSQL): Multi-tenant B2B lead generation and email outreach SaaS with tenant isolation at the data-access layer, per-tenant SMTP/OAuth sending and a retrieval-grounded AI chat assistant.
- **LogiqMoM** (.NET desktop, LLM): Records Google Meet, Zoom and Teams meetings and generates AI meeting minutes; ships as a LogiqWealth add-on.
- **LogiqClean** – github.com/ginesh-tandel/LogiqClean (open source): .NET CLI that scaffolds Clean Architecture solutions, built in public.

EDUCATION

Master of Computer Applications (MCA) – Uka Tarsadia University, Gujarat **Jul 2011 – Jul 2014**
